CORE SKILLS

Cybersecurity

- Network Security
- Digital Forensics
- Incident Response
- Threat Detection
- Risk Assessment
- Evidence Handling

Networking & Systems

- TCP/IP
- VLANs
- DNS
- DHCP
- Windows
- Linux
- Windows Server

Development

- Java
- Python
- SQL
- HTML/CSS
- JavaScript
- C/C++
- Git/GitHub

Tools

- Wireshark
- Nmap
- Autopsy
- FTK Imager
- OWASP ZAP
- Burp Suite
- VMware
- VirtualBox

CERTIFICATION

IBM Cybersecurity Fluency Pathway

Issued 12 July 2026

LANGUAGES

Swahili - Native / Fluent
English - Fluent

PROFESSIONAL STRENGTHS

Analytical problem solving
Technical research
Teamwork and communication
Public speaking
Adaptability and persistence

ADDITIONAL

Tanzanian national
Valid driving licence
References available on request

PROFESSIONAL PROFILE

Cybersecurity graduate with a strong ICT foundation and practical experience providing technical support in professional and academic environments. Experienced in computer troubleshooting, user support, networking fundamentals and Java-based software development. Built UFITAT, a USB forensic investigation application focused on evidence integrity, chain of custody and threat assessment. Interested in network security, digital forensics, incident response and secure infrastructure, with a strong commitment to continuous learning and practical problem solving.

PROFESSIONAL EXPERIENCE

- IT Support Technician**

Aug 2022 - Oct 2023

Jays Softnet Solutions

 - Provided technical support for office staff and customers across hardware, software and peripheral-device issues.
 - Installed, configured and maintained Windows computers, productivity software, printers and related equipment.
 - Diagnosed operating-system, application and connectivity problems using structured troubleshooting methods.
 - Performed malware removal, system maintenance and user assistance to support reliable daily operations.
- Information Technology Intern**

Jun 2022 - Jul 2022

Mbeya University of Science and Technology

 - Supported computer-laboratory maintenance, software installation and routine hardware troubleshooting.
 - Assisted students and staff with technical issues and participated in everyday IT support activities.

SELECTED PROJECTS

UFITAT - USB Forensic Investigation and Threat Assessment Tool

Final-year cybersecurity project

Designed and developed a desktop application that supports forensic examination of USB storage devices while preserving evidence integrity. The system provides USB monitoring, automated case creation, file inventory, SHA-256 hashing, threat findings, investigation logs, chain-of-custody records and PDF reporting.

JavaJavaFXSQLiteMavenGitDigital Forensics

School Management and Timetable System

Application in development

Designed to manage students, teachers, subjects and venues while generating timetables and detecting clashes involving classes, instructors and rooms.

System DesignSchedulingConflict Detection

EDUCATION

- Bachelor Degree in Cyber Security**

2023 - 2026

Institute of Accountancy Arusha
- Diploma in Information and Communication Technology**

2019 - 2022

Mbeya University of Science and Technology - GPA: 3.7
- Computer Course Certification**

2014

Community Computer Training Center
- Certificate of Secondary Education**

2015 - 2018

Star Secondary School
- Primary Education**

2006 - 2014

Upendo English Medium School
